Tel (209) 664-5030 **Fax** (209) 664-5037

Bio

BIO

Dr. Chaudhari is a radiation oncologist with the Stanford Medicine Cancer Center and a clinical assistant professor in the Department of Radiation Oncology at Stanford University School of Medicine.

In every case, he develops a comprehensive, compassionate care plan personalized to the unique needs of each patient. His goal is always to deliver innovative, compassionate care of the highest quality to help each patient achieve the best possible outcome.

Dr. Chaudhari conducts research into leading-edge treatments, allowing him to offer the most advanced care options. He has investigated stereotactic body radiation therapy for non-small cell lung cancer and for pancreatic adenocarcinoma. He has also studied the effects of radiotherapy on breast cancer stem cells and extramedullary plasmacytomas. He also is currently studying the use of proton beam therapy on recurrent head and neck cancers.

Dr. Chaudhari has presented his research findings at meetings of the Radiation Research Society, Society for Thermal Medicine, American Society for Radiation Oncology, and World Congress of Brachytherapy. He has published articles on radiotherapy for non-small cell lung cancer in the journal *Lung Cancer: Targets and Therapy*. He also co-authored the chapter "Renal and Adrenal Vasculature: Anatomy and Imaging" in the textbook *Image-Guided Interventions*. He has served as a reviewer for *Cancer Medicine*.

In previous positions, Dr. Chaudhari served on committees dedicated to care quality assurance and to the monitoring of cancer care protocols. Other areas of interest include radiation oncology department operations and advising radiation oncology residents.

Dr. Chaudhari is a member of the American Society for Radiation Oncology.
