

Stanford

Peter William Earl Kane

Director, Research to the People, Genetics

Bio

BIO

Peter is the Director of Research to the People @ Stanford (<https://rtp.stanford.edu>).

Rare Disease: Currently organizing a collaborative study for Hypophosphatasia, a rare metabolic bone disease. Please contact us if you would like to be involved!

Oncology: Research to the People at Stanford is a program for patients who have exhausted their clinical options and need to move beyond standard of care. We generate deep sequencing and multi-omics data, create cell-lines, and host tumor boards to interrogate new therapeutic possibilities.

Our vision is to produce 100 of the deepest cancer case studies possible.

Research to the People joined Dr. Michael Snyder's Lab at Stanford Medicine in July 2021.

EDUCATION AND CERTIFICATIONS

- BA, University of Minnesota , Chinese Language and Literature (2011)

PERSONAL INTERESTS

Cycling. I ride my bike quite a bit.
