Cheryl Yemoto
Sr. Research Safety Specialist, Lab Safety Program, Environmental Health and Safety (EH&S)

Publications

Biochemical recurrence without PSA progression characterizes a subset of patients after radical prostatectomy. Prostate-specific antigen. *Urology* 2003; 61 (2): 380-385

Polymorphisms in the androgen receptor and type II 5 alpha-reductase genes and prostate cancer prognosis *PROSTATE* 2002; 52 (4): 269-278

Preoperative serum prostate specific antigen levels between 2 and 22 ng./ml. correlate poorly with post-radical prostatectomy cancer morphology: Prostate specific antigen cure rates appear constant between 2 and 9 ng./ml. *Proceedings of the Annual Meeting of the American-Urological Association* 2002: 103–11

Relationship between systematic biopsies and histological features of 222 radical prostatectomy specimens: Lack of prediction of tumor significance for men with nonpalpable prostate cancer *JOURNAL OF UROLOGY* 2001; 166 (1): 104-109

Preoperative serum prostate specific antigen does not reflect biochemical failure rates after radical prostatectomy in men with large volume cancers *JOURNAL OF UROLOGY* 2000; 164 (5): 1596-1600

Assessment of morphometric measurements of prostate carcinoma volume *CANCER* 2000; 89 (5): 1056-1064

Modified extrafascial radical retropubic prostatectomy technique decreases frequency of positive surgical margins in T2 cancers < 2 cm(3) *EUROPEAN UROLOGY* 2000; 38 (1): 64-73

Prostate cancer is highly predictable: A prognostic equation based on all morphological variables in radical prostatectomy specimens *JOURNAL OF UROLOGY* 2000; 163 (4): 1155-1160

Examination of the 3 molecular forms of serum prostate specific antigen for distinguishing negative from positive biopsy: Relationship to transition zone volume *JOURNAL OF UROLOGY* 2000; 163 (1): 119-126
• Biological determinants of cancer progression in men with prostate cancer. *JAMA-JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION*
  Stamey, T. A., McNeal, J. E., Yemoto, C. M., Sigal, B. M., Johnstone, I. M.
  1999; 281 (15): 1395-1400

• Histological and clinical findings in 896 consecutive prostates treated only with radical retropubic prostatectomy: Epidemiologic significance of annual changes. *JOURNAL OF UROLOGY*
  Stamey, T. A., Donaldson, A. N., Yemoto, C. E., McNeal, J. E., Sozen, S., Gill, H.
  1998; 160 (6): 2412-2417

• Classification of localized untreated prostate cancer based on 791 men treated only with radical prostatectomy: Common ground for therapeutic trials and TNM subgroups. *JOURNAL OF UROLOGY*
  Stamey, T. A., Sozen, T. S., Yemoto, C. M., McNeal, J. E.

• Significance of demonstrable vascular space invasion for the progression of prostatic adenocarcinoma. *AMERICAN JOURNAL OF SURGICAL PATHOLOGY*
  McNeal, J. E., Yemoto, C. E.
  1996; 20 (11): 1351-1360

• Spread of adenocarcinoma within prostatic ducts and acini - Morphologic and clinical correlations. *AMERICAN JOURNAL OF SURGICAL PATHOLOGY*
  McNeal, J. E., Yemoto, C. E.
  1996; 20 (7): 802-814

• The periurethral glands do not significantly influence the serum prostate specific antigen concentration. *JOURNAL OF UROLOGY*
  Oesterling, J. E., Tekchandani, A. H., Martin, S. K., Bergstralh, E. J., Reichstein, E., Diamandis, E. P., Yemoto, C., Stamey, T. A.
  1996; 155 (5): 1658-1660

• Prostate specific antigen releases a kinin-like substance on proteolysis of seminal vesicle fluid that stimulates smooth muscle contraction. *JOURNAL OF UROLOGY*
  Fichtner, J., GRAVES, H. C., THATCHER, K., Yemoto, C., Shortliffe, L. M.
  1996; 155 (2): 738-742

• CELL-PROLIFERATION IN DYSPLASIA OF THE PROSTATE - ANALYSIS BY PCNA IMMUNOSTAINING. *PROSTATE*
  McNeal, J. E., Haillot, O., Yemoto, C.
  1995; 27 (5): 258-268
