#### BIO

Dr. Ashley Griffin is a medical informatics postdoctoral research fellow at the Center for Primary Care and Outcomes Research at Stanford and the VA Palo Alto Health Care System Center for Innovation to Implementation. Her research focuses on the use of digital health technologies and patient-generated health data to support patients with multimorbidities. Dr. Griffin's research seeks to develop methods and tools that can empower patients to take an active role in their health and inform decision-making for the care team.
