

Heather Ryan Pankow

Life Science Research Professional 2, Psych/General Psychiatry and Psychology (Adult)

Bio

BIO

Heather graduated with a BS in Microbiology with an emphasis in Biotechnology from Florida Atlantic University. She is a Life Science Research Professional that joined the Department of Psychiatry in 2000, exploring genetic markers in antidepressant treatment and smoking cessation, gene expression in Alzheimer's disease transgenic mouse models, cytokine expression in primary microglia and microglial-hippocampal organotypic co-cultures, and organizing a database of mood disorders subjects across labs to facilitate collaboration. She recently shifted focus to clinical research and is excited to be involved with the human side of the DNA she has been studying. She is looking forward to contributing to the advance of treatment options for depression and other mood disorders.
