

Kamran Tehranchi

Ph.D. Student in Civil and Environmental Engineering, admitted Autumn 2023

Bio

BIO

Kamran Tehranchi is a Ph.D. Student in Civil & Environmental Engineering at Stanford University researching electricity system planning and decision-making under uncertainty applied towards offshore wind integration in California. He has previously worked in the public sector as a Shultz Energy Fellow at the California Independent System Operator (CAISO), an analyst at a Community Choice Aggregator (CCA), and within city and county governments. He is advised by Professor Inês Azevedo and is a member of the Interdisciplinary Energy Systems research group. He received his BS in Mechanical Engineering at Northwestern University.
