

Stanford

Fridah Nyakundi

Ph.D. Student in Environment and Resources, admitted Autumn 2021

Bio

BIO

Fridah Nyakundi is an E-IPER PhD student whose broad research interests include productive water use, intensification of smallholder farms, land-use change and food security in Sub-Saharan Africa. Fridah graduated with a bachelor in economics and statistics (2014) and a masters of arts in economics (2016), both from the University of Nairobi. Her thesis focused on sustainably optimizing extractive forests in Kenya by calculating the optimal rotation period of three tree species that are the most harvested in Kenya.

Before her PhD program, Fridah worked as a Senior Research Associate with the International Center For Tropical Agriculture (CIAT) within the Africa region.

PROFESSIONAL AFFILIATIONS AND ACTIVITIES

- Member, Africa Forest Forum (AFF) (2015 - present)
- Junior Fellow, Environment for Development (EFD) Kenya (2016 - present)
- Member, Women in Environmental Economics for Development (WinEED) (2021 - present)
