

Joshua Leaston

MD Student with Scholarly Concentration in Bioengineering / Neuroscience, Behavior, and Cognition, expected graduation Spring 2026

Bio

BIO

Joshua Leaston is a MD candidate with a concentration in bioengineering and application in Neuroscience, behavior, and cognition in the Stanford University School of Medicine. A member of the entering class of 2021, Joshua holds a degree in Neuroscience with a minor in Health Science and has received various academic excellence awards and scholarships.

His research interests include the development of quantitative neuroimaging methodologies for neurosurgical and radiological outcome improvement. He has also received a research fellowship from a Boston based neuroimaging organization and MedScholars funding for his research on neuroimaging methodologies. This is further augmented by a Stanford-based seed grant, enabling him to delve into the investigation of disparities in outcomes of image-guided procedures within high-risk patient populations nationwide.

In addition to his academic pursuits, he is also the co-founder of a company focused on addressing disparities in skin cancer through advanced imaging, which has been recognized through the Stanford Biodesign NEXT award and eWEAR.

Further, he is dedicated to raising awareness around the intersectionality between the unhoused community and medicine. Joshua co-founded a nonprofit dedicated to supporting unhoused individuals, where he has raised funding to sustainably support the cause since 2019.

Joshua has also demonstrated his dedication to advancing science and medicine through several presentations, including a talk at Tufts Medicine on barriers in medical school enrollment for minorities and a presentation at Northeastern University on "How to Build a Nonprofit." He has presented at conferences such as Rise, KTGF, SPINE, RSNA, ACR, ASNR, AANS, ISMRM, and the AMEC-SNMA conference, and has published in peer-reviewed journals.

In conclusion, Joshua Isaac Leaston's academic excellence, research contributions, and dedication to social causes showcase his strong potential to become a compassionate and impactful physician scientist.

EDUCATION AND CERTIFICATIONS

- Bachelor of Science, Northeastern University (2020)
- Bachelor of Science, Northeastern University , Neuroscience (2020)
