

Juha Gogulski

Visiting Scholar, Psych/Public Mental Health & Population Sciences

Bio

BIO

Juha Gogulski (MD, PhD) works as a Visiting Postdoc at Keller Laboratory (Stanford University, Department of Psychiatry and Behavioral Sciences in the School of Medicine). He is interested in the development of novel personalized neuromodulation treatments. In his PhD thesis, he used tractography-guided transcranial magnetic stimulation to study the neural mechanisms of tactile working memory, metacognition, and tactile temporal perception.
