

Giorgio Camillo Ricciardiello Mejia

Masters Student in Epidemiology and Clinical Research, admitted Autumn 2023

Bio

BIO

As a proactive and dedicated Biomedical Engineer from Colombia, Giorgio has embarked on a journey that spans continents. Giorgio completed a BSc at the Università Degli Studi Di Genova and pursued an MSc at Denmark Technical University, enriching Giorgio's global perspective and expertise in the field. Driven by an unyielding curiosity and a profound passion for research, Giorgio is on a mission to offer automated solutions in the healthcare sector.

Currently, Giorgio is pursuing a graduate program in Epidemiology and Clinical Research at Stanford University, while also serving as a research assistant at the Mignot Laboratory. In this capacity, Giorgio actively contributes to groundbreaking projects, actively involved in designing cutting-edge AI and ML models for the Alliance Sleep Questionnaire and PSG data. Giorgio's aim is to transform the way sleep physicians diagnose and treat patients, paving the way for improved healthcare practices.

With a proactive and visionary approach to problem-solving, combined with collaboration with brilliant minds, Giorgio pioneers advancements in healthcare. Giorgio's work strives to leave a lasting impact on patient care, aspiring to a future where technology and medicine unite for the betterment of humanity.
