

Stanford

Rachel J. Mesia

Program Director, Community Research & Capacity-Building, Stanford Cancer Institute Core

Bio

CURRENT ROLE AT STANFORD

At the Stanford Cancer Institute, Ms. Mesia is working in cancer control and clinical research to reduce the burdens of cancer and promote health equity. As Program Director for Community Research and Capacity-Building, she is responsible for leading efforts that enhance collaborations, community health planning, and program/project delivery with community and research partnerships. She is also managing the cancer clinical trials outreach-recruitment services and activities, which seeks to enhance knowledge and foster inclusive community access to cancer research.
