Bio

BIO

As a researcher in the field of Technology & Health, my research interest lies in the design and implementation of technology-framed health care solutions to improve human life and well-being. I have conducted research projects with a diverse range of populations, including older adults, children, adolescents, and underrepresented communities. My multi-disciplinary academic and professional background enables me to approach technology from a human-centered perspective, ensuring that the solutions I design are tailored to meet the unique needs of the individuals and communities I work with.
