

Marta Arenas Jal

Postdoctoral Scholar, Bioengineering

Bio

BIO

Marta holds a PhD in pharmaceutical technology and an Executive MBA. She is passionate about healthcare research and innovation and has several years of experience in leading R&D projects within the pharmaceutical industry. Prior to joining Stanford Biodesign, Marta worked at CIMTI which is an accelerator for health startups that supports innovators to develop and implement solutions that improve healthcare quality and patient outcomes.

Throughout her career, she has demonstrated a strong track record of successfully translating research and innovation into real-world impact. She is a curious, creative, and open-minded person who is always seeking to solve complex problems in order to make a positive impact on patients' lives. In her current role as Innovation Fellow at Stanford Byers Center for Biodesign, she is part of a team working on developing innovative solutions to address unmet needs in healthcare.

INSTITUTE AFFILIATIONS

- Member, Maternal & Child Health Research Institute (MCHRI)

STANFORD ADVISORS

- Josh Makower, Postdoctoral Faculty Sponsor
- James Wall, Postdoctoral Research Mentor
