

Sung (Dave) Jeon, MD

Affiliate, Department Funds

Bio

BIO

Dr. Jeon is a neurocritical care fellow at Stanford University School of Medicine. He studied English and Neuroscience at Amherst College, where he graduated Magna Cum Laude. He subsequently acquired his medical degree at the University of Rochester School of Medicine and Dentistry, and completed his residency in neurology at the University of Colorado School of Medicine. He has a background in liberal arts with experiences in palliative care and clinical research, which ranges from deep-brain electrophysiology, behavioral psychiatry, as well as management of status epilepticus and low NIHSS large vessel occlusion strokes. Some of his favorite hobbies include hiking, reading, wine tasting, and going to the dog park with his roommate Kaia, who is one judgmental Shiba Inu. He fell in love with neurocritical care in medical school and residency for its high acuity environment, complexity of cases, and interaction with patients and families.
