

Nicole Turk

Assistant Clinical Research Coordinator, Medicine - Med/Endocrinology

Bio

BIO

Nicole is the assistant clinical research coordinator in the McLaughlin Lab. She recently graduated from the University of California, Davis with a B.S. in Neurobiology, Physiology, and Behavior. At Davis, she volunteered at Dr. Carsten's Lab researching the neural mechanisms of itch and pain. As assistant clinical research coordinator, Nicole hopes to use her passion for medicine to advance research findings and help those in need. She is kind, hard-working, and perpetually inspired to ignite positive, lasting change in her community.
