#### BIO

Dr. Nel-Themaat has been in the field of assisted reproduction for more than 20 years, with the past 11 years in clinical IVF. She possesses a unique combination of a strong academic background, broad technical experience and extensive leadership, and management training. Through a multi-dimensional approach, she has helped to improve patient care and outcomes in Assisted Reproductive Technology (ART).

Dr. Nel-Themaat was most recently employed as the Regional IVF Lab Director for Shady Grove Fertility in Colorado and served as the IVF Lab Director at University of Colorado Advanced Reproductive Medicine. She received her PhD from LSU, Baton Rouge and recently completed an Executive Masters of Business Administration program at the University of Denver.

Her goal is to advance the field “by building strong, high performing lab teams, by carefully evaluating and adapting appropriately to industry trends, by training and educating the current and next generations, and by participating in collaborative research that enhances our understanding of reproduction.”

In her free time, Dr. Nel-Themaat loves to spend time with her husband and two children, preferably in nature. With them, she enjoys skiing, hiking, biking, swimming and anything nature has to offer. She likes to cook out and introduce our American friends to South African cuisine, especially a “braai,” which is their version of a BBQ. During school holidays, she likes to visit family in South Africa, go on safari and enjoy the beautiful beaches. Dr. Nel-Themaat enjoys jamming on the piano, guitar, drums and microphone with her family. She also considers herself very competitive and loves playing and watching sports or playing board games.
