Bio

BIO

Ryann Fame PhD joined the faculty at Stanford University in 2022. Following her undergraduate degree in Biology and Chemistry at the College of William & Mary, Dr. Fame completed a PhD in Molecular and Cellular Biology at Harvard University. She conducted postdoctoral fellowships at The Whitehead Institute for Biomedical Research at MIT and at Boston Children's Hospital Pathology Department. Her research program encompasses the early neural stem cell niche, neural tube closure, cerebrospinal fluid (CSF), metabolism, and cortical neuronal development. As a stem cell and developmental molecular biologist, Dr. Fame is dedicated to broad collaboration focused on translating an understanding of neural development and CSF biology into regenerative strategies for the treatment of neurodevelopmental disease.

ACADEMIC APPOINTMENTS

- Assistant Professor, Neurosurgery
- Member, Bio-X
- Member, Maternal & Child Health Research Institute (MCHRI)
- Member, Wu Tsai Neurosciences Institute

HONORS AND AWARDS

- McCormick and Gabilan Faculty Award, Stanford University OFDD (2023-2025)
- Research Grant, The Shurl and Kay Curci Foundation (2023-2025)
- Hydrocephalus Innovator Award, Hydrocephalus Association (2022-2023)
- Office of Faculty Development Career Award, Boston Children's Hospital (2020-2022)
- Balkin-Markell-Weinberg Postdoctoral Fellow, The Whitehead Institute (2015-2016)
- NIH NRSA Graduate Research Fellow (F31), National Institutes of Health (NIH) (2010-2012)
- NSF Post Graduate Research Fellow, National Science Foundation (NSF) (2007-2010)
- Derek Bok Certificate of Distinction in Teaching, Harvard University (2007)
- Ashford Fellow, Harvard University (2006-2013)
- Vranos Fellow, Harvard University (2006-2007)

- Biology Departmental Senior Thesis Award, The College of William and Mary (2006)
- International Research Award, The College of William and Mary (2005)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Member, Society for Neuroscience (2007 - present)

PROFESSIONAL EDUCATION

- PhD, Harvard University , Stem Cell and Regenerative Biology (2013)
- AM, Harvard University , Molecular and Cellular Biology (2008)
- AB, The College of William and Mary , Biology and Chemistry (2006)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Early neural progenitors respond to extrinsic cues that maintain and support their potency. These stem/ progenitor cells are in direct contact with the cerebrospinal fluid (CSF), which acts as part of their niche. Our research program encompasses the early neural stem cell niche, neural tube closure, CSF, metabolism, and cortical neuronal development. We are dedicated to broad collaboration focused on translating an understanding of neurodevelopment and CSF biology into regenerative strategies.
