

Madison Freeman

- MBA, expected graduation 2024
- Masters Student in Environment and Resources, admitted Spring 2023
- Research Asst - Graduate, Graduate School of Business - Other Faculty

Bio

BIO

Madison Freeman is a Knight Hennessy Scholar pursuing a master's degree in business administration at Stanford Graduate School of Business and a master's degree in environment and resources at the Stanford Doerr School of Sustainability through the Emmett Interdisciplinary Program in Environment and Resources. She focuses on innovative approaches to scale emerging climate solutions, especially those accelerating decarbonization of heavy industries and transportation.

Immediately prior to Stanford, Madison served in the Biden administration as a senior advisor on technology and innovation to Special Presidential Envoy for Climate John Kerry, where she led industrial decarbonization global initiatives including the First Movers Coalition. She spent three years in venture capital at Energy Impact Partners, a leading climate investment fund with strategic LPs across the utility and built environment space. At EIP, she developed investment strategy for new sectors explored by the firm, engaged strategic LPs, invested in hardtech startups and helped establish funds focused on backing underrepresented founders and deep decarbonization breakthroughs. She started her career in climate and innovation policy think tanks, at the Atlantic Council and Council on Foreign Relations. Madison founded and directed the NYC chapter of the Clean Energy Leadership Institute, was a 2021 Women Leader in Energy and Climate Fellow with the Atlantic Council, and her clean energy analysis has been published in outlets including NPR, Foreign Affairs, and The Hill. She graduated from American University with a bachelor's degree in international relations and economics.
