

L. Julian Mele

Postdoctoral Scholar, Materials Science and Engineering

Bio

BIO

Julian graduated in electrical engineering and received his PhD from the University of Udine (Italy). During his PhD, he worked on electrochemical modeling of performance and noise for electronic biosensors and bioactuators. Then he continued as a postdoctoral scholar in Prof. Palestri's group, where he focused on modeling and simulations of conjugated polymers for bioelectronic applications. He joined Prof. Salleo's group in the fall of 2022 where he is contributing to the understanding of the physical operation of organic devices.

HONORS AND AWARDS

- Editor's Choice Article Certificate, MDPI Sensors Journal (2021)
- Best BSc Graduate student award in Electrical Engineering, University of Udine (3/07/2015)

STANFORD ADVISORS

- Alberto Salleo, Postdoctoral Faculty Sponsor
