

Ian Sato

Program Manager, Education, Institute for Human-Centered Artificial Intelligence (HAI)

Bio

BIO

Ian Sato (he/him) is the education program manager at the Stanford Institute for Human-Centered Artificial Intelligence. He is responsible for the curation, management, and execution of HAI's education programs across various learner groups such as executives, government officials, and healthcare professionals. He aspires to help audiences from diverse backgrounds gain perspective on the potential of human-centered AI to support its ethical application and ensure a more equitable future for humankind.

Prior to joining HAI, Ian spent a decade working in education abroad, most recently as a director of academic affairs at Hult EF Corporate Education. In this role, he consulted with government and corporate entities operating in the Asia Pacific region as a thought leader in education, with a particular focus on the development of effective hybrid and virtual programs. Prior to that he worked in roles across the academic spectrum in research and teaching roles for K-12, university, corporate, and executive learning audiences.

Ian earned his B.A. in Philosophy from DePaul University and M.A. in Philosophy from University of Oregon.
