

Stanford

Karteek Kunala

Research Engineer, Ophthalmology Research/Clinical Trials

SUPERVISORS

- Alfredo Dubra

Bio

BIO

My current interests are in development of design and instrumentation of pre-clinical vision devices, to conduct non-invasive in vivo retinal imaging. I studied Physics with a concentration in optics during my time at University of Hyderabad, India and received a bachelors and masters degree in 2014. I then moved to USA to continue working in the field of optics at University of North Carolina at Charlotte to pursue my PhD, working on nanofabrication of broadband anti-reflective structures. My interest in vision science started with my job at University of Rochester as a research scientist, where I was involved in developing optical imaging tools using adaptive optics to study retinal diseases. My work was focused on development of fluorescence lifetime imaging techniques in humans and two photon fluorescence microscopy in mouse.

EDUCATION AND CERTIFICATIONS

- Ph.D., University of North Carolina at Charlotte , Optical Science and Engineering (2018)
- MS, University of North Carolina at Charlotte , Optical Science and Engineering (2018)
- MSc, University of Hyderabad, INDIA , Physics (2014)

Professional

WORK EXPERIENCE

- Research Engineer - Stanford University (October 2022 - present)
- Research Scientist - University of Rochester (January 2019 - September 2022)

Publications

PUBLICATIONS

- **Near Infrared Autofluorescence Lifetime Imaging of Human Retinal Pigment Epithelium Using Adaptive Optics Scanning Light Ophthalmoscopy.** *Investigative ophthalmology & visual science*
Kunala, K., Tang, J. A., Bowles Johnson, K. E., Huynh, K. T., Parkins, K., Kim, H. J., Yang, Q., Sparrow, J. R., Hunter, J. J.
2024; 65 (5): 27

- **Near-infrared adaptive optics fluorescence lifetime ophthalmoscopy of human retinal pigment epithelium reveals variations with eccentricity and disease**
Kunala, K., Tang, J., Johnson, K., Huynh, K. T., Parkins, K., Yang, Q., Hunter, J. J.
ASSOC RESEARCH VISION OPHTHALMOLOGY INC.2023
- **Prolonged Fluorescence Lifetimes of the Retinal Pigment Epithelium in Human Subjects with Pentosan Polysulfate Sodium Toxicity**
Johnson, K., Tang, J., Kunala, K., Parkins, K., Yang, Q., Hunter, J. J.
