

Bruna de Freitas Dias

Postdoctoral Scholar, Psychiatry

Bio

BIO

I am a Brazilian physician and neuroscientist with a special interest in autoimmune neurological diseases. I graduated from Albert Einstein Medical School, Sao Paulo – Brazil in 2021. My research predominantly focuses on studying the epidemiology of autoimmune encephalitis and genetic susceptibility to the disease onset. Furthermore, I am interested in assessing the burden of the disease in those patients, socioeconomic analysis, and environmental and infectious triggers for the disease onset. At Mignot's Lab, I am involved in IGNITE project, and I am working in the association of clinical and epidemiological data, KIR sequencing, and GWAS analysis.

My interests include general neurology, neuroimmunology, neuroscience, healthcare, and technology.

PROFESSIONAL EDUCATION

- Doctor of Medicine, Unlisted School (2022)
- MD, Faculdade Israelita de Ciencias da Saude Albert Einstein (2021)

STANFORD ADVISORS

- Emmanuel Mignot, Postdoctoral Faculty Sponsor
