

Stanford

Ozge Bozkurt

Postdoctoral Scholar, Photon Science, SLAC

Bio

BIO

Ozge is a Chemical and Biological Engineer with a focus on catalysis. She conducted research on biocatalysis during her MSc studies in TU Delft, on heterogeneous catalysis during her PhD studies at Koc University, and pyrolysis of plastic waste during her postdoc at Penn State. Ozge also has industrial R&D experience in a petroleum refinery, with a specialization on biofuels.
