

Emanuel Manzo-Casio

Life Science Research Professional 1, Neurology

Bio

BIO

Emanuel completed his B.A. in Molecular and Cell Biology with an emphasis in Medical Biology at the University of California - Berkeley in 2022. During his time at UC Berkeley, he worked in Dr. Daniel Portnoy's lab studying the effect of bacterial genes on the morphology and phenotype in *Listeria Monocytogenes*. He joined the Yang lab as a Life Science Research Professional in 2023 and is researching microtubule-associated proteins in neurodegenerative diseases.

CURRENT ROLE AT STANFORD

Life Science Research Professional

EDUCATION AND CERTIFICATIONS

- B.A., UC Berkeley , Molecular and Cell Biology (2022)
