

Johanna Rodehau Noack

Postdoctoral Scholar, Political Science

Bio

BIO

Johanna is an International Security Postdoctoral Fellow at the Center of International Security and Cooperation. In her research, she is interested in questions around how problems of international politics become to be seen as such in the first place. Johanna pursues these questions with a specific focus on ideas of war and its prevention. Her current work investigates the role of (emerging) technologies in conflict prevention and anticipation, and in particular how artificial intelligence/machine learning shapes ideas of what conflict is, how to recognize it, and how to govern it.

Before coming to CISAC, Johanna was a Global Innovation Program Postdoctoral Fellow at the University of Pennsylvania's Perry World House. She received her PhD in International Relations from the London School of Economics in June 2022. She also holds an MA in Political Science and a BA in International Development from the University of Vienna, Austria.
