

## Batuhan Bayram

Postdoctoral Scholar, Human Gene Therapy

### Bio

---

#### BIO

Dr. Bayram is a medical doctor from Turkey, who earned his medical degree from Istanbul University- Cerrahpasa School of Medicine. After finishing medical school, he worked as a General Practitioner in Turkey and gained clinical experience at UCLA, Cleveland Clinic, and Tufts Medical Center. Dr. Bayram has been involved in several projects at Mellins Lab, focusing primarily on studying Natural Killer (NK) cells in Pediatric Acute-onset Neuropsychiatric Syndrome (PANS). He conducted perforin assays as part of the PANS NK study, aiming to understand the differences between PANS patients and healthy controls. Dr. Bayram has a keen interest in Rheumatology and Immunology, with aspirations to specialize as a rheumatologist in the future.
