Aidan Wade
Undergraduate, School of Medicine

Bio

Aidan is an undergraduate at Kent State University studying Neuroscience. He is a visiting member of the 3D Genomics Lab for eight weeks as part of the SSRP-Amgen Scholars program. His project involves studying epigenetic changes within the hippocampus in response to neuromodulatory inputs. He is also a member of the Mellott Lab at Northeast Ohio Medical University where he studies the ultrastucture of the rat inferior colliculus across age. He is interested in addiction, learning, memory, motivation, maladaptive behavior, depression, and anxiety. In his leisure time he enjoys rock climbing and finding trails to walk.
