#### BIO

I'm a postdoctoral researcher in Department of Management Science and Engineering (MS&E) at Stanford University, hosted by Prof. Jose Blanchet.

Prior to that, I received my Ph.D. at Peking University in 2023, where I was advised by Prof. Zhihua Zhang. Previously, I received my Bachelor's degree in Statistics from School of Mathematical Sciences, Peking University in 2018.

My research interests lie broadly in the intersection areas among probability, statistics and machine learning, with applications spanning operations research, reinforcement learning, and deep learning. Specifically, I am interested in establishing statistical theories for modern large-scale models and designing practical algorithms with theoretical guarantees.

I am on the 2024-2025 job market looking for full-time academia positions. I am happy to discuss any opportunities!

Please see my personal website for more details: <https://web.stanford.edu/~yangwh/>
