

Salomon Wollenstein Beteach

Postdoctoral Scholar, Business

Bio

BIO

I am a Postdoctoral Scholar at Stanford, GSB working with Kostas Bimpikis and Yonatan Gur on topics related to transportation markets, supply chains and inventory management. Prior to my postdoc position, I received my Ph.D. in Systems Engineering (2022) at Boston University (advised by Christos G. Cassandras and Ioannis Ch. Paschalidis) and I have held industry-research positions at Amazon, IBM, Tubi and PROS.

My research focuses on understanding and improving the operations of transportation markets, mobility-on-demand platforms, and smart cities using empirics and network optimization methods. More broadly, I am interested in developing methods to inform public policy to address operational societal problems related to sustainability, health, and transportation.

STANFORD ADVISORS

- Kostas Bimpikis, Postdoctoral Faculty Sponsor
