Bio

BIO

Dr. Williams is the founding Director of the Stanford Center for Precision Mental Health and Wellness. The Center connects researchers across the campus to advance high definition imaging biotypes for mental health, sensor technology, machine learning approaches, targeted therapeutics and the world's first biotype-guided trials.

Within her Center, Dr. Williams' leads the PanLab for Precision Psychiatry and Translational Neuroscience. The PanLab has developed a radical new way to understand and treat mental health disorders based on a personalized approach to neuroscience. Dr. Williams also leads department-wide initiatives in precision mental health as Associate Chair of Translational Neuroscience. She has a joint position at the Palo Alto VA Mental Illness Research, Education and Clinical Center where she is Director of Education and Precision Medicine.

After first graduating Dr. Williams worked with patients experiencing serious mental disorders and who had been hospitalized for many years. This experience transformed the trajectory of her career. She went on to complete her PhD in 1996 with a British Council scholarship for study at Oxford University. She joined the Stanford faculty as a Professor of Psychiatry and Behavioral Sciences in 2013. Prior to this time, she was foundation Professor of Cognitive Neuropsychiatry at the Sydney Medical School and Director of the interdisciplinary Sydney Brain Dynamics Center for 12 years.

Her translational programs integrate advanced neuroimaging, technology and digital innovation to transform the way we detect mental disorders, predict mental states, tailor interventions and promote wellness. Data-driven computational approaches are used to refine this transformative approach. Her experience is that a neuroscience-informed model empowers each person with an understanding of their own brain function and can reduce stigma. Her research forms the foundation of the first patented taxonomy for depression and anxiety that quantifies brain circuits for diagnostic precision and prediction. She has contributed over 400 scientific papers to the field.

ACADEMIC APPOINTMENTS

- Professor, Psychiatry and Behavioral Sciences
- Professor (By courtesy), Psychology
- Member, Bio-X
- Member, Wu Tsai Human Performance Alliance
- Member, Wu Tsai Neurosciences Institute

ADMINISTRATIVE APPOINTMENTS

- Director, Stanford Center for Precision Mental Health and Wellness, (2018- present)
- Director of Education and Precision Medicine, VA Palo Alto Sierra-Pacific MIRECC, (2020- present)
- Associate Chair, Translational Neuroscience, Psychiatry and Behavioral Sciences, Stanford University, (2018- present)
- Associate Chair, Research Strategy, Psychiatry and Behavioral Sciences, Stanford University, (2016-2018)
- Chair, Steering Committee, Major Laboratories and Clinical Translational Neurosciences Incubator, Psychiatry and Behavioral Sciences, Stanford University, (2015-2018)
- Director of PTSD Education and Dissemination, VA Palo Alto Sierra-Pacific MIRECC, (2013-2019)

HONORS AND AWARDS

- Fellow, American College of Neuropsychopharmacology (2017)
- Chairman's Award for Advancing Science, Stanford University (2016)
- Ernst Strüngmann Award: "Schizophrenia evolution and synthesis", Ernst Strüngmann Institute for Neuroscience in Cooperation with Max Planck Institute (2012)
- Presidential Award, American Psychosomatic Society (2008)
- Senior Biomedical Research Fellowship, Pfizer Foundation (2004)
- Young Investigator Award, International Schizophrenia Congress (2001)
- Senior Scientist Award, 10th Biennial Winter Workshop on Schizophrenia (2000)
- Research Award for advanced study at the Institute of Psychiatry London, Wellcome Trust-Ramaciotti Foundation (1998)
- Outstanding Postgraduate Lecturer of the Year, University of Sydney (1997)
- Postgraduate scholarship for Oxford University, British Council (1991)
- Australian Postgraduate Research Award, Australian federal government (1990)
- Prize for Top Honors Research Thesis, Australian Psychological Society (1990)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Scientific Advisory Board, One Mind Psyberguide, of the One Mind Institute (2015 - present)
- Program Chair, 2021 Society for Biological Psychiatry Annual Meeting (2019 - present)
- Member, Global Future Council on Technologies for Mental Health - World Economic Forum (2019 - present)
- Member, American College for Neuropsychopharmacology (2012 - present)
- Member, Society for Biological Psychiatry (2009 - present)
- Member, Society for Biological Psychiatry Women's Leadership Group (2016 - present)
- Editorial Board, Depression and Anxiety (Wiley-Blackwell) (2018 - present)
- Editorial Board, Network Neuroscience (MIT Press) (2017 - present)
- Editorial Board, Personalized Medicine for Psychiatry (Elsevier) (2016 - present)
- Faculty member, Stanford Precision Health and Integrated Diagnostics Center (PHIND) (2018 - present)
- Faculty member, Stanford Neurosciences Institute (2016 - present)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

A revolution is under way in psychiatry.

We can now understand mental illness as an expression of underlying brain circuit disruptions, shaped by experience and genetics.

Our challenge is to now accelerate the translation of these insights into new models of mental disorder, and improve lives. Right now, mental disorders are our number one cause of ruined lives. At least 1 in 10 of us is affected by these disorders but only a fraction get access to treatment. Fewer still get better after the first treatment they try.

My lab is finding solutions to these problems.

We are defining precision brain circuit types for mood, anxiety and attention disorders. We apply computational models to large amounts of brain imaging, behavior and other data. These precision brain types inform our translational intervention studies. To close the loop, field ready insights are applied in practice.

We are advancing a neuroscience-informed approach to Precision Mental Health for Psychiatry.

1. Neural circuit taxonomy

We have developed a novel brain-based taxonomy for understanding mental disorders. Each person's experience of mental disorder is characterized as an expression of the way in which underlying circuits are disrupted. Our model accounts for how circuit disruptions are shaped by early life experience, by daily function, and by genetic contributions.

2. Advanced computational models

To continually refine our taxonomy, and to discover new types, we use advanced machine-learning approaches. By choosing to use common data elements, we have amassed the largest available databank of integrated imaging, physiological, behavioral and genetic data on a spectrum of mood, anxiety and attention disorders, people at risk of these disorders and healthy people. With these large amounts of data, we are accelerating the discovery of new types, and the detailed mapping between brain circuits, behavior and experience.

3. Mapping human connectomes

In a new human connectome study, we are adding higher resolution imaging of brain connectivity to our brain circuit model. With these connectome data, we extend our taxonomy to the precise mapping of how each person's brain circuits connect and communicate, and how "short circuits" in these connections cause particular types of symptom experiences.

4. Biomarkers to predict treatment

Our lab led the first multi-site international studies to identify imaging and genetic biomarkers that predict the right treatment for the right person at the right time. With these advances, we can double the number of people who recover from depression.

5. Accelerating translation into practice

There is a giant chasm between neuroscience insights and their application in practice to improve lives for people experiencing mental disorders. To close this loop, we lead first-in-nation studies to accelerate the translation of field-ready insights into clinical practice and education.

Because our focus is on changing the way we understand mental disorder, our lab embraces the heterogeneity of these disorders. We focus on the commonly co-occurring experiences of mood, anxiety and attentional disruption in adults and in young people. We also investigate other commonly associated experiences such as substance use.

For more about what motivates us see:

2019
- **Paying attention to attention in depression.** *Translational psychiatry*
Keller, A. S., Leikauf, J. E., Holt-Gosselin, B. n., Staveland, B. R., Williams, L. M.
2019; 9 (1): 279
- **Deep phenotyping of attention impairments and the 'Inattention Biotype' in Major Depressive Disorder.** *Psychological medicine*
Keller, A. S., Ball, T. M., Williams, L. M.
2019: 1–10
- **Characterizing neurocognitive markers of familial risk for depression using multi-modal imaging, behavioral and self-report measures.** *Journal of affective disorders*
Watters, A. J., Carpenter, J. S., Harris, A. W., Korgaonkar, M. S., Williams, L. M.
2019; 253: 336–42
- **Dimensions of anxiety in Major depressive disorder and their use in predicting antidepressant treatment outcome: an iSPOT-D report.** *Psychological medicine*
Braund, T. A., Palmer, D. M., Williams, L. M., Harris, A. W.
2019: 1–11
- **Heart rate variability as a biomarker of anxious depression response to antidepressant medication** *DEPRESSION AND ANXIETY*
Kircanski, K., Williams, L. M., Gotlib, I. H.
2019; 36 (1): 63–71
- **Gender-specific structural abnormalities in major depressive disorder revealed by fixel-based analysis** *NEUROIMAGE-CLINICAL*
Lyon, M., Welton, T., Varda, A., Maller, J. J., Broadhouse, K., Korgaonkar, M. S., Koslow, S. H., Williams, L. M., Gordon, E., Rush, A., Grieve, S. M.
2019; 21
- **Cognitive ability is associated with changes in the functional organization of the cognitive control brain network** *HUMAN BRAIN MAPPING*
Breukelaar, I. A., Williams, L. M., Antees, C., Grieve, S. M., Foster, S. L., Gomes, L., Korgaonkar, M. S.
2018; 39 (12): 5028–38
- **Functional Impacts of Acute Stress on Negative Affective Circuit Function in Anxiety and Depression**
Goldstein-Piekarski, A., Tozzi, L., Sudheimer, K., Schatzberg, A., Williams, L.
NATURE PUBLISHING GROUP.2018: S232
- **Striatal dopamine deficits predict reductions in striatal functional connectivity in major depression: a concurrent 11C-raclopride positron emission tomography and functional magnetic resonance imaging investigation.** *Translational psychiatry*
Hamilton, J. P., Sacchet, M. D., Hjornevik, T., Chin, F. T., Shen, B., Kampe, R., Park, J. H., Knutson, B. D., Williams, L. M., Borg, N., Zaharchuk, G., Camacho, M. C., Mackey, et al
2018; 8 (1): 264
- **Striatal dopamine deficits predict reductions in striatal functional connectivity in major depression: a concurrent C-11-raclopride positron emission tomography and functional magnetic resonance imaging investigation** *TRANSLATIONAL PSYCHIATRY*

Hamilton, J., Sacchet, M. D., Hjornevik, T., Chin, F. T., Shen, B., Kampe, R., Park, J., Knutson, B. D., Williams, L. M., Borg, N., Zaharchuk, G., Camacho, M., Mackey, et al
2018; 8

● **A negative association between brainstem pontine grey-matter volume, well-being and resilience in healthy twins** *JOURNAL OF PSYCHIATRY & NEUROSCIENCE*

Gatt, J. M., Burton, K. O., Routledge, K. M., Grasby, K. L., Korgaonkar, M. S., Grieve, S. M., Schofield, P. R., Harris, A. F., Clark, C., Williams, L. M.
2018; 43 (6): 386–95

McLaughlin, N. C., Paul, R. H., Grieve, S. M., Williams, L. M., Laidlaw, D., DiCarlo, M., Clark, C. R., Whelihan, W., Cohen, R. A., Whitford, T. J., Gordon, E. 2007; 25 (4): 215-221
 - **Fronto-limbic and autonomic disjunctions to negative emotion distinguish schizophrenia subtypes** *PSYCHIATRY RESEARCH-NEUROIMAGING*
Williams, L. (., Das, P., Liddell, B. J., Olivieri, G., Peduto, A. S., David, A. S., Gordon, E., Harris, A. W. 2007; 155 (1): 29-44

- **Genotypes and neural binding in negative affect: The contribution of genetic polymorphisms to 40 hz gamma phase synchrony** *62nd Annual Meeting of the Society-of-Biological-Psychiatry*
Williams, L. M., Gatt, J. M., Kuan, S., Dobson-Stone, C., Paul, R. H., Schofield, P. R., Gordon, E.
ELSEVIER SCIENCE INC.2007: 265S–265S
- **Longitudinal changes in neuroanatomy and neural activity in early schizophrenia** *NEUROREPORT*
Whitford, T. J., Farrow, T. F., Rennie, C. J., Grieve, S. M., Gomes, L., Brennan, J., Harris, A. W., Williams, L. M.
2007; 18 (5): 435-439
- **Integrating "brain" and "body" measures: correlations between EEG and metabolic changes over the human lifespan.** *Journal of integrative neuroscience*
Boord, P. R., Rennie, C. J., Williams, L. M.
2007; 6 (1): 205-218
- **Does fronto-limbic functional connectivity predict clinical outcome in schizophrenia?**
Das, P., Flynn, G., Harris, A. W., Whitford, T. J., Williams, L. M.
OXFORD UNIV PRESS.2007: 364–65
- **Gamma-phase synchrony and greymatter volume: A longitudinal study of first episode schizophrenia**
Whitford, T. J., Das, P., Flynn, G., Harris, A., Gordon, E., Williams, L.
OXFORD UNIV PRESS.2007: 414
- **Too much or too little? High-frequency neural synchrony in first episode schizophrenia**
Williams, L. M., Whitford, T., Boord, P., Alexander, D., Das, P., Wong, W., Gordon, E., Harris, A. W., Flynn, G.
OXFORD UNIV PRESS.2007: 549
- **Brain maturation in adolescence: Concurrent changes in neuroanatomy and neurophysiology** *HUMAN BRAIN MAPPING*
Whitford, T. J., Rennie, C. J., Grieve, S. M., Clark, C. R., Gordon, E., Williams, L. M.
2007; 28 (3): 228-237
- **A genotype-endophenotype-phenotype path model of depressed mood: integrating cognitive and emotional markers.** *Journal of integrative neuroscience*
Gatt, J. M., Clark, C. R., Kemp, A. H., Liddell, B. J., Dobson-Stone, C., Kuan, S. A., Schofield, P. R., Williams, L. M.
2007; 6 (1): 75-104
- **An integrative approach to determine the best behavioral and biological markers of methylphenidate.** *Journal of integrative neuroscience*
Hermens, D. F., Cooper, N. J., Clark, C. R., Debrota, D., Clarke, S. D., Williams, L. M.
2007; 6 (1): 105-140
- **Brain structure and function correlates of general and social cognition.** *Journal of integrative neuroscience*
Rowe, D. L., Cooper, N. J., Liddell, B. J., Clark, C. R., Gordon, E., Williams, L. M.
2007; 6 (1): 35-74
- **Integrating objective gene-brain-behavior markers of psychiatric disorders.** *Journal of integrative neuroscience*
Gordon, E., Liddell, B. J., Brown, K. J., Bryant, R., Clark, C. R., Das, P., Dobson-Stone, C., Falconer, E., Felmingham, K., Flynn, G., Gatt, J. M., Harris, A., Hermens, et al
2007; 6 (1): 1-34
- **Rates of decline distinguish Alzheimer's disease and mild cognitive impairment relative to normal aging: integrating cognition and brain function.** *Journal of integrative neuroscience*
Liddell, B. J., Paul, R. H., Arns, M., Gordon, N., Kukla, M., Rowe, D., Cooper, N., Moyle, J., Williams, L. M.
2007; 6 (1): 141-174
- **Mapping frontal-limbic correlates of orienting to change detection** *NEUROREPORT*
Williams, L. M., Felmingham, K., Kemp, A. H., Rennie, C., Brown, K. J., Bryant, R. A., Gordon, E.
2007; 18 (3): 197-202
- **Functional disconnections in the direct and indirect amygdala pathways for fear processing in schizophrenia** *SCHIZOPHRENIA RESEARCH*
Das, P., Kemp, A. H., Flynn, G., Harris, A. W., Liddell, B. J., Whitford, T. J., Peduto, A., Gordon, E., Williams, L. M.
2007; 90 (1-3): 284-294
- **Changes in anterior cingulate and amygdala after cognitive behavior therapy of posttraumatic stress disorder** *PSYCHOLOGICAL SCIENCE*

- Felmingham, K., Kemp, A., Williams, L., Das, P., Hughes, G., Peduto, A., Bryant, R.
2007; 18 (2): 127-129
- **A profile of cognitive and brain function markers for diagnostic use in ADHD**
Hermens, D. F., Clarke, S. D., Kohn, M. R., Clark, R., Cooper, N. J., Keage, H. A., Gordon, E., Williams, L. M.
ELSEVIER SCIENCE INC.2007: S11–S11
 - **Cognitive aging, executive function, and fractional anisotropy: A diffusion tensor MR imaging study** *AMERICAN JOURNAL OF NEURORADIOLOGY*
Grieve, S. M., Williams, L. M., Paul, R. H., Clark, C. R., Gordon, E.
2007; 28 (2): 226-235
 - **Cross-cultural assessment of neuropsychological performance and electrical brain function measures: Additional validation of an international brain database** *INTERNATIONAL JOURNAL OF NEUROSCIENCE*
Paul, R. H., Gunstad, J., Cooper, N., Williams, L. M., Clark, C. R., Cohen, R. A., Lawrence, J. J., Gordon, E.
2007; 117 (4): 549-568
 - **The relationship between frontal gray matter volume and cognition varies across the healthy adult lifespan** *AMERICAN JOURNAL OF GERIATRIC PSYCHIATRY*
Zimmerman, M. E., Brickman, A. M., Pau, R. H., Grieve, S. M., Tate, D. F., Gunstad, J., Cohen, R. A., Aloia, M. S., Williams, L. M., Clark, C. R., Whitord, T. J., Gordon, E.
2006; 14 (10): 823-833
 - **Regional white matter and neuropsychological functioning across the adult lifespan** *33rd Annual Meeting of the International-Neuropsychological-Society*
Brickman, A. M., Zimmerman, M. E., Paul, R. H., Grieve, S. M., Tate, D. F., Cohen, R. A., Williams, L. M., Clark, C. R., Gordon, E.
ELSEVIER SCIENCE INC.2006: 444–53
 - **Progressive grey matter atrophy over the first 2-3 years of illness in first-episode schizophrenia: A tensor-based morphometry study** *NEUROIMAGE*
Whitford, T. J., Grieve, S. M., Farrow, T. F., Gomes, L., Brennan, J., Harris, A. W., Gordon, E., Williams, L. M.
2006; 32 (2): 511-519
 - **Standardized assessment of cognitive functioning during development and aging using an automated touchscreen battery** *ARCHIVES OF CLINICAL NEUROPSYCHOLOGY*
Clark, C. R., Paul, R. H., Williams, L. A., Arns, M., Fallahpour, K., Handmer, C., Gordon, E.
2006; 21 (5): 449-467
 - **Longitudinal changes in regional grey matter volume and corresponding EEG power in first-episode psychosis**
Whitford, T. J., Farrow, T. F., Rennie, C. J., Grieve, S. M., Gomes, L., Brennan, J., Williams, L. M., Harris, A. W.
INFORMA HEALTHCARE.2006: A122–A123
 - **Automated and controlled processing of fear facial expression display dysfunctions in the amygdala pathways in schizophrenia: a functional connectivity approach**
Das, P., Flynn, G., Harris, A. W., Kemp, A. H., Liddell, B. J., Whitford, T., Peduto, A., Gordon, E., Williams, L. M.
