Stanford

Jayden Ziegler

Adjunct Professor, Symbolic Systems Program

Bio

BIO

Jayden got his PhD in psychology from Harvard in 2019. His research was on linguistic structure in the mind and brain. Since then, he has worked in AI/ML product development at Apple, Google, and now Alembic Technologies (https://getalembic.com), a marketing analytics startup he jointly leads as the VP of Product. Jayden is passionate about running (https://medium.com/runners-life/what-i-learned-from-running-every-day-straight-for-the-past-7-years-and-counting-6438f9dd03f3), volunteering (https://outintech.com/mentorship-program/), and serial entrepreneurship (https://stupidsimplebudgeting.com).
