

Stanford

Gaurav Saini

Life Science Research Professional, Pediatrics - Cardiology

Bio

BIO

As a Life Science Research Professional 1 at Stanford University School of Medicine, I contribute to cutting-edge research projects in molecular biology and stem cell technology, using advanced techniques such as gel electrophoresis, PCR, and cell viability assays. I work with a diverse and collaborative team of researchers, faculty, and students, and support the development and implementation of research protocols, data analysis, and report writing.

I also have a Master's degree in Biotechnology and Bioinformatics from California State University Channel Islands, with a focus on Stem Cell Technology and Lab Management. I have a Bachelor's degree in Dental Surgery from Himachal Pradesh University in India, where I gained valuable experience in dental research and practice. I am passionate about learning new skills and gaining global exposure in the field of life sciences. I value universal humanity, sacred religion, and philanthropy, and I enjoy cycling, physical workout, music, reading, movies, creative writing, and sports in my spare time.

CURRENT ROLE AT STANFORD

Life Science Research Professional 1

HONORS AND AWARDS

- CIRM bridges to stem cell research trainee award, California State university Channel Islands (08/01/2022)

EDUCATION AND CERTIFICATIONS

- Master of Science, California State University Channel Islands , Biotechnology and Bioinformatics (2023)
- Bachelor of Dental Surgery, Himachal Pradesh University , Dentistry (2020)
