

Murray Connelly Cutforth

Physical Science Research Scientist

Mechanical Engineering

Bio

BIO

Murray Cutforth is a research scientist on the PSAAP III project at the Center for Turbulence Research. He works with Professor Eric Darve on uncertainty quantification of laser-ignited turbulent combustion. During his PhD at the University of Cambridge, Murray studied sharp interface methods for multi-material flow, and subsequently has worked on applications of machine learning in medical image and text analysis in industry.

ACADEMIC APPOINTMENTS

- Physical Science Research Scientist, Mechanical Engineering
