

Stanford

Alex Manchester

Mathematics, Statistics & Computational Sciences Librarian, Science Library

Bio

BIO

I received a Ph.D. in mathematics from Rice University, with research in knot and link concordance, satellite constructions, and 4-dimensional manifolds, particularly in the topological setting. Before coming to Stanford, I also worked as the Mathematics Collection Development assistant at Rice's Fondren Library. I assisted with the selection and acquisition of new books, as well as the weeding of of damaged and outdated books in the collection. Additionally, I contributed to our online research guides, particularly on the history of math, as well as AI and its relationship to accessibility. I also helped to run workshops for students on LaTeX and Overleaf.

EDUCATION AND CERTIFICATIONS

- Ph.D., Rice University , Mathematics (2024)
- M.S., University of Chicago , Mathematics (2019)
