## Ricardo Chia M.D.

Fellow in Graduate Medical Education

### Bio

---

#### BIO

Dr. Chia completed his undergraduate studies in Biological Sciences at the University of California, Davis. He went on to earn his medical degree from George Washington University School of Medicine. He then completed his internal medicine training at the University of Illinois Hospital and the University of Texas Southwestern Medical Center, where he also pursued further specialization in clinical hypertension and hypertensive disorders. Under the mentorship of Dr. Vongpatanasin, he received the Ruth L. Kirschstein National Research Service Award (NRSA) T32 research grant, through which he studied the effects of dietary inorganic phosphates on exercise capacity and hypertension. After completing his training in cardiovascular diseases at Thomas Jefferson University Hospitals, he joined the advanced heart failure and transplant cardiology fellowship here at Stanford University.

Dr. Chia has interests in right ventricular failure, pulmonary hypertension, HFpEF, hypertensive cardiomyopathies, transplant cardiology, cardiac hemodynamics, mechanical circulatory support, and ventricular assist devices.

#### CLINICAL FOCUS

- Advanced Heart Failure, Mechanical Circulatory Support, and Transplant Cardiology
- Transplant Cardiology
- Cardiovascular Diseases
- Hypertensive Cardiomyopathies
- Hypertensive Disorders
- Fellow

### Publications
