Casual - Non-Exempt, Rad/Integrative Biomedical Imaging Informatics at Stanford

## Bio

**BIO**

I am a research engineer in the Integrative Biomedical Imaging Informatics group at Stanford (IBIIS). My work involves the development of artificial intelligence and machine learning algorithms for applications in:

1. Computer Vision

2. Medical Imaging

3. Biomedical Informatics

I received my Master's in Electrical and Computer Engineering (ECE) from The University of Texas at Austin, advised by Dr. Jon Tamir. During my MS in ECE, I completed a research internship at Amazon Health, exploring the application of large language models (LLMs) in clinical text summarization tasks. Previously, I graduated with a Master of Science in Information Technology (MSITM) from The University of Texas at Austin and completed my capstone project at Dell Technologies, as a Machine Learning Engineer.
