

Stanford

Connie Fung

Postdoctoral Scholar, Pathology

Bio

BIO

Connie received her B.S. in Microbiology, Immunology, and Molecular Genetics from UCLA, where she conducted research on how the eukaryotic parasite *Toxoplasma gondii* invades and replicates inside host cells in the lab of Dr. Peter Bradley. Subsequently, she obtained her Ph.D. in Microbiology & Immunology from Stanford University with Dr. Manuel Amieva. Her thesis research involved the use of high-resolution microscopy to study how the bacterium *Helicobacter pylori* establishes and maintains persistent colonization of the gastric epithelium. Connie joined Dr. Michael Howitt's lab as a postdoctoral research fellow in 2019 and is currently investigating how tuft cells, specialized taste-chemosensory cells, modulate epithelial cell function and mucosal immunity in response to intestinal parasites and commensals.

INSTITUTE AFFILIATIONS

- Member, Maternal & Child Health Research Institute (MCHRI)

HONORS AND AWARDS

- A.P. Giannini Foundation Postdoctoral Research Fellowship, A.P. Giannini Foundation (2021-2024)
- Maternal & Child Health Research Institute Postdoctoral Fellowship, Stanford School of Medicine (2021)
- Dean's Postdoctoral Fellowship, Stanford School of Medicine (2020)
- Office of Graduate Education Travel Grant, Stanford School of Medicine (2016, 2017)
- NSF Graduate Research Fellowship, National Science Foundation (2014-2017)
- Stanford Graduate Fellowship, Stanford University (2012-2017)

PROFESSIONAL EDUCATION

- Doctor of Philosophy, Stanford University , Microbiology & Immunology (2019)
- Bachelor of Science, University of California, Los Angeles , Microbiology, Immunology, and Molecular Genetics (2012)
