Stanford

Landon Bradshaw

MD Student with Scholarly Concentration in Health Services & Policy Research / Health Equity and Social Justice, expected graduation Winter 2029

Bio

BIO

Landon Bradshaw is a medical student at Stanford University School of Medicine with interests in gastroenterology-related illnesses, health policy, and advancing health equity. His work focuses on how healthcare policy and system-level structures influence access to high-quality cancer care, particularly among historically underserved populations.

He conducts health services and outcomes research in the Stanford Surgery Policy Improvement Research & Education Center (Dawes Lab), where he examines the impact of Medicaid expansion on treatment utilization and survival outcomes in metastatic colorectal cancer. His broader research interests include evaluating policy mechanisms that drive adoption of innovative evidence-based therapies and designing system-level interventions that promote equitable care delivery.

At Stanford, Landon serves as President of the Stanford Medical Student Association, the elected governing body representing nearly 600 MD and PA students. In this role, he has led institutional initiatives focused on equity, community engagement, and resource stewardship, including securing funding for large-scale service-learning programming and implementing a formalized, equity-centered framework for student organization funding.

Landon is committed to a career at the intersection of academic medicine, policy, and leadership, with the goal of shaping healthcare systems that deliver high-value, equitable care at scale.

HONORS AND AWARDS

- Goldwater Scholarship, Barry Goldwater Scholarship and Excellence in Education Foundation (2021)
- Community Impact Award, Stanford Alumni Association (2026)

EDUCATION AND CERTIFICATIONS

- Bachelor of Science (Honors), Wake Forest University , Biochemistry & Molecular Biology (2023)
