#### BIO

Wayne Kepner, PhD, MPH is a public health researcher whose scholarship focuses on health disparities and substance use among vulnerable populations. Dr. Kepner is currently a T-32 Post-doctoral Fellowship in Pain and Substance Use at Stanford University's School of Medicine, where he will continue his research under the mentorship of Dr. Keith Humphreys and Dr. Mark McGovern.

Dr. Kepner received his doctoral degree from the Joint Doctoral Program in Interdisciplinary Research on Substance Use at San Diego State University and the University of California, San Diego. His research focused on substance use disorders, health services utilization, and geospatial analysis of health data, with a particular emphasis on older adult populations. Dr. Kepner has extensive experience in both qualitative and quantitative research methods, having conducted interviews with older adults on cannabis use and analyzed large-scale electronic health records. He has co-authored several peer-reviewed publications on topics ranging from cannabis use trends to emergency department utilization for substance-related diagnoses. In addition to his academic work, Dr. Kepner is committed to community engagement, co-founding Aztecs For Recovery, a collegiate recovery program at SDSU.
