

Megan Martin

Ph.D. Student in Bioengineering, admitted Autumn 2024

Bio

BIO

I am a Bioengineering PhD student in the Radiological Sciences Laboratory. My research interest is in advancing magnetic resonance imaging (MRI) techniques to understand brain physiology, enhance disease diagnosis, and improve patient care. Before joining Stanford Bioengineering in 2024, I investigated the impact of congenital heart defects on neurodevelopment as part of the Pediatric Heart and Brain Research Group at UCSF. I graduated from the University of San Francisco in 2021 with a BS in Chemistry and Mathematics.
