## Research & Scholarship

### CURRENT RESEARCH AND SCHOLARLY INTERESTS

We launched a national precision medicine PAD trial called, VascTrac (<http://vasctrac.stanford.edu/>). This trial is mobile phone based and leverages Apple's ResearchKit Platform to monitor a patient's activity both pre- and post-intervention. We are validating mobile phone surveillance for PAD patients and are currently enrolling.

### CLINICAL TRIALS

- Study of the Effectiveness of Telmisartan in Slowing the Progression of Abdominal Aortic Aneurysms, Recruiting
- VascTrac Peripheral Arterial Disease (PAD) Study, Not Recruiting
