

Stanford

Lisa Giocomo

Associate Professor of Neurobiology

Bio

ACADEMIC APPOINTMENTS

- Associate Professor, Neurobiology
- Member, Bio-X
- Member, Wu Tsai Neurosciences Institute

HONORS AND AWARDS

- Office of Naval Research Young Investigator Award, Office of Naval Research (2018)
- Young Investigator Award, Society for Neuroscience (2018)
- James S McDonnell Foundation Scholar, James S McDonnell Foundation Scholar (2016 - 2022)
- Robertson Neuroscience Investigator – New York Stem Cell Foundation, New York Stem Cell Foundation (2015-2019)
- Klingenstein-Simons Fellowship Award in the Neurosciences, Klingenstein-Simons Foundation (2014-2017)
- Sloan Fellow, Alfred P. Sloan Foundation (2013-2015)
- Peter and Patricia Gruber International Research Award, The Gruber Foundation (2012)

PROFESSIONAL EDUCATION

- BA, Baylor University , Psychology (2002)
- PhD, Boston University , Neuroscience (2008)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My laboratory studies the cellular and molecular mechanisms underlying the organization of cortical circuits important for spatial navigation and memory. We are particularly focused on medial entorhinal cortex, where many neurons fire in spatially specific patterns and thus offer a measurable output for molecular manipulations. We combine electrophysiology, genetic approaches and behavioral paradigms to unravel the mechanisms and behavioral relevance of non-sensory cortical organization. Our first line of research is focused on determining the cellular and molecular components crucial to the neural representation of external space by functionally defined cell types in entorhinal cortex (grid, border and head direction cells). We plan to use specific targeting of ion channels, combined with in vivo tetrode recordings, to determine how channel dynamics influence the neural representation of space in the behaving animal. A second, parallel line of research, utilizes a combination of in

vivo and in vitro methods to further parse out ionic expression patterns in entorhinal cortices and determine how gradients in ion channels develop. Ultimately, our work aims to understand the ontogenesis and relevance of medial entorhinal cortical topography in spatial memory and navigation.

Teaching

COURSES

2020-21

- Neuroscience Systems Core: NEPR 203 (Aut)

2019-20

- Neuroscience Systems Core: NEPR 203 (Spr)

2018-19

- Neuroscience Systems Core: NEPR 203 (Aut)

2017-18

- Neuroscience Systems Core: NEPR 203 (Aut)

STANFORD ADVISEES

Doctoral Dissertation Reader (AC)

Luke Brezovec, Daniel Cardozo Pinto, Avery Krieger, Gabriel Mel, Ethan Richman, Daniel Shaykevich, Ilana Zucker-Scharff

Postdoctoral Faculty Sponsor

Emily Aery Jones, Alexander Attinger, Alex Gonzalez, Mari Sosa, Yanjun Sun

Doctoral Dissertation Advisor (AC)

Tucker Fisher, Linnie Jiang, Isabel Low, Francis Masuda, Mark Plitt

Doctoral Dissertation Co-Advisor (AC)

Corey Fernandez, John Wen

GRADUATE AND FELLOWSHIP PROGRAM AFFILIATIONS

- Neurosciences (Phd Program)
