

Summer Han

Assistant Professor (Research) of Neurosurgery and of Medicine (Biomedical Informatics)

 Curriculum Vitae available Online

Bio

ACADEMIC APPOINTMENTS

- Assistant Professor (Research), Neurosurgery
- Assistant Professor (Research), Medicine - Biomedical Informatics Research
- Member, Bio-X
- Member, Stanford Cancer Institute

HONORS AND AWARDS

- NIH MERIT Award, National Institutes of Health (June 2018)
- Stanford Spectrum Pilot Award, Stanford School of Medicine (January 2017)
- Research Fellowship, Division of Cancer Epidemiology and Genetics, National Cancer Institute (August 2012)
- Paper Competition Award, Joint Statistical Meetings of the American Statistical Association (August 2008)
- Conference Travel Fund Award, Yale Graduate Student Assembly (June 2008)
- Dissertation Fellowship, Yale Graduate School (September 2008)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Associate Editor, Molecular Carcinogenesis (2018 - present)
- JSM Program Chair elect, Statistical Consulting Section, American Statistical Association (2018 - present)
- Member, Korean International Statistics Society (2017 - present)
- Member, The International Association for the Study of Lung Cancer (IASLC) (2017 - present)
- Statistical Editor, The Editorial Board of the Journal of the National Cancer Institute (2012 - present)
- Member, American Statistical Association (2008 - present)
- Member, American Society of Human Genetics (2008 - present)
- Member, International Genetic Epidemiology Society (2008 - 2013)

PROFESSIONAL EDUCATION

- PhD, Yale University , Statistics (2009)
- M.A., Yale University , Statistics (2004)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My current research focuses on understanding the genetic and environmental etiology of complex disease and developing and evaluating efficient screening strategies based on etiological understanding. The areas of my research interests include statistical genetics, molecular epidemiology, cancer screening, health policy modeling, and risk prediction modeling. I have developed various statistical methods to analyze high-dimensional data to identify genetic and environmental risk factors and their interactions for complex disease.
