Bio

CLINICAL FOCUS

- Pediatric CriticalCare Medicine
- Pediatrics
- Solid Organ Transplantation
- Sedation

ACADEMIC APPOINTMENTS

- Clinical Assistant Professor, Pediatrics - Critical Care
- Member, Maternal & Child Health Research Institute (MCHRI)

PROFESSIONAL EDUCATION

- Fellowship: Stanford University Pain Management Fellowship (2012) CA
- Internship: University of Brooklyn at Long Island College Hospital (2007) NY
- Medical Education: University of Medicine and Pharmacy Carol Davila (2003) Romania
- Board Certification: Pediatric Critical Care Medicine, American Board of Pediatrics (2012)
- Board Certification, American Board of Pediatrics , Pediatric Critical Care Medicine (2012)
- Board Certification: Pediatrics, American Board of Pediatrics (2009)
- Residency: University of Illinois at Chicago College of Medicine (2009) IL

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

I do have multiple interests in the ICU: from quality improvement to research, from transplant to palliative care. However, most of my projects are related to transplant medicine and quality improvement. My initial resident QI project changed the way kidney transplant recipients are managed in the immediate postoperative period at University of Illinois at Chicago. My fellowship research looked at pharmacokinetics after liver transplant and my preliminary results are very promising. As part of my

scholarly activities for the last 6 months I am conducting a research study, looking at ways to better monitor and manage the pediatric kidney transplant in the ICU by assessing the hemodynamics in the first 48 hours post transplant.

As part of my QI involvement, I am currently mentoring some of the PCCM fellows in longitudinal quality improvement projects such as: sedation in recipients of liver transplantation, ICU outcomes for children receiving bone marrow transplantation.
