Bio

BIO

Dr. Benjamin Raber is a board-certified, fellowship-trained surgical oncologist at Stanford Health Care. He is also a clinical assistant professor in the Department of Surgery, Division of General Surgery at Stanford University School of Medicine.

Dr. Raber specializes in surgical treatments for benign and cancerous breast diseases. He performs a wide range of procedures, including lumpectomy, nipple-sparing mastectomy, and preventive mastectomy. Dr. Raber uses the latest and most effective surgical approaches, including wire-free, breast-conserving surgery for lumpectomies and hidden scar surgery (to hide incisions). He is committed to compassionate, patient-centered care that involves close collaboration with his colleagues in medical and radiation oncology, radiology, and plastic surgery.

Dr. Raber is actively involved in community outreach and breast cancer education. He has led regional initiatives to promote awareness, expand access to breast cancer screenings, and improve early detection.

Dr. Raber's research focuses on improving surgical treatments for breast cancer, including better ways to treat cancer that has spread to nearby lymph nodes. He has also explored using ultrasound imaging to help surgeons locate and remove cancerous tissue more precisely during breast-conserving surgery. His research has been published in prominent peer-reviewed journals, including Annals of Surgical Oncology, Magnetic Resonance Imaging Clinics of North America, and The American Journal of Surgery.

Dr. Raber is a fellow of the American College of Surgeons (ACS) and a member of the American Society of Breast Surgeons (ASBrS).
