Bio

BIO

Janene H. Fuerch, MD is a Clinical Associate Professor of Neonatology at Stanford University Medical Center, as well as an innovator, educator, researcher and physician entrepreneur. She has an undergraduate degree in Neuroscience from Brown University and a medical degree from the Jacobs School of Medicine at SUNY Buffalo. At Stanford University she completed a pediatrics residency, neonatal-perinatal medicine fellowship and the Byers Center for Biodesign Innovation Fellowship.

She is also Assistant Director of the Biodesign Innovation Fellowship Program at Stanford University, and Co-Director of Impact1 where she mentors and advises new entrepreneurs through all aspects of medical device development, from identifying clinical needs to commercialization. Her specific areas of investigational interest include the development and commercialization process of neonatal, pediatric and maternal health medical devices as well as the utilization of a simulated environment to develop and test medical devices. She is a national leader in neonatal resuscitation, ECMO, device development and has been an AHRQ and FDA funded investigator. But her work extends outside of the academic realm to industry having co-founded EMME (acquired by Simple Health 2022) an award-winning reproductive health company, medical director for Novonate (acquired by Laborie 2023) a neonatal umbilical catheter securement company and notable consultant for Vitera (EXTEND - artificial environment to decrease complications of prematurity), and Avanos™. Janene is passionate about improving the health of children and newborns through medical device innovation and research.
