

## Robert K. Jackler, MD

Edward C. and Amy H. Sewall Professor, Emeritus

Otolaryngology (Head and Neck Surgery)

 NIH Biosketch available Online

 Curriculum Vitae available Online

### CLINICAL OFFICE (PRIMARY)

- **Stanford Ear Institute**

2452 Watson Ct Ste 1700

MC 5841

Palo Alto, CA 94303

**Tel** (650) 723-5281

**Fax** (650) 497-7849

### ACADEMIC CONTACT INFORMATION

- **Administrative Contact**

Carolyn E. Taylor - Administrative Associate

**Email** [cet02@stanford.edu](mailto:cet02@stanford.edu)

**Tel** (650) 862 2197

### Bio

---

#### BIO

Dr. Jackler was raised in Waterville, Maine, attended college and medical school in Boston, and moved west to the University of California, San Francisco for residency in Otolaryngology-Head & Neck Surgery (1979-84). After completing a Neurotology fellowship at the House Ear Clinic (1985), Dr. Jackler joined the faculty at UCSF where he remained until 2003 when he was appointed the Sewall Professor and Chair of the Department of Otolaryngology-Head & Neck Surgery and professor in the departments of Neurosurgery and Surgery at the Stanford University School of Medicine. During his 18 years as Chair the faculty grew from 6 to 53, residents/fellows from 14 to 35, and basic and translational research greatly expanded. In both 2023 and 2024, Stanford OHNS was ranked #1 on US News.

Prior to his retirement from clinical practice in 2024, Dr. Jackler served as otologist-neurotologist specializing in complex ear diseases with a special interest in tumors of the lateral and posterior cranial base. He has contributed numerous analytical papers derived from his microsurgical series. A longstanding collaboration with medical illustrator Chris Galapp has produced @3000 original illustrations of ear and cranial base surgery. For over 3 decades Dr. Jackler offered a fellowship program in neurotology & skull base surgery which trained many academic leaders in the field.

Dr. Jackler has authored 200+ peer reviewed papers, 40+ chapters, numerous editorials, published four books Neurotology (1994, 2004, planned 3<sup>rd</sup> edition 2025), Atlas of Neurotology & Skull Base Surgery (1996, 2008), Tumors of the Ear and Temporal Bone (2000), and Ear Surgery Illustrated (2019). Along with Professor Stefan Heller, Dr. Jackler created the Stanford Initiative to Cure Hearing Loss whose mission is to create biological cures for major forms of inner ear hearing loss through a research effort that is sustained, large-scale, multidisciplinary, focused, goal-oriented, and transformational. He is past president of the American Neurotology Society, editor-in chief emeritus of the journal Otolaryngology & Neurotology, and is an honorary member of the Royal College of Surgeons in both London and Edinburgh.

In 2006, Dr. Jackler founded the interdisciplinary research group Stanford Research Into The Impact of Tobacco Advertising which conducts research into the promotional activities of the tobacco industry. SRITA has collected >62,000 original tobacco advertisements which now reside in the National Museum of American History of the Smithsonian Institution. SRITA maintains an extensive online digital collection of tobacco advertisements for use by scholars ([tobacco.stanford.edu](http://tobacco.stanford.edu)) which has had over 1.1 million unique users from around the world.

Among other accomplishments, SRITA research was instrumental in exposing the promotional activities which underlay JUUL's viral popularity among teens. Current SRITA research is focused upon emerging tobacco products such as IQOS, Puff Bar, Elf Bar, and recreational oral nicotine products with a special emphasis upon how these new devices are marketed to adolescents via use of social media and influencers. Following retirement from his clinical practice and leadership roles, Dr. Jackler's primary career focus is research into the advertising practices of the tobacco industry with studies designed to provide the analysis needed by regulators and legislators to inform policy decisions.

## **CLINICAL FOCUS**

- Neurotology

## **ACADEMIC APPOINTMENTS**

- Professor Emeritus-Hourly, Otolaryngology (Head and Neck Surgery)
- Member, Wu Tsai Neurosciences Institute

## **ADMINISTRATIVE APPOINTMENTS**

- Associate Dean, Postgraduate Medical Education, School of Medicine, (2007-2011)
- Stanford OHNS Departmental Chair, Department of Otolaryngology-Head & Neck Surgery, (2003-2021)

## **HONORS AND AWARDS**

- Distinguished Alumni Award, Boston University (2015)
- Distinguished Alumni Award, Boston University School of Medicine (2014)
- Honorary Fellow, Royal College of Surgeons (London) (2012)
- Honorary Fellow, Royal College of Surgeons (Edinburgh) (2005)
- Honorary Member, French Society of ENT (1996)
- Distinguished Service Award, American Academy of Otolaryngology- Head & Neck Surgery (1999)

## **PROFESSIONAL EDUCATION**

- Residency: University of California San Francisco (1984) CA
- Internship: University of California San Francisco (1980) CA
- Medical Education: Boston University School of Medicine (1979) MA
- Board Certification: Neurotology, American Board of Otolaryngology (2004)
- Fellowship: House Ear Institute (1985) CA
- Board Certification: Otolaryngology, American Board of Otolaryngology (1984)
- MD, Boston Univ School of Medicine , Medicine (1979)

## **Research & Scholarship**

---

### **CURRENT RESEARCH AND SCHOLARLY INTERESTS**

In 2006 I created a research group which studies the impact tobacco advertising, marketing, and promotion. The initial priority of SRITA was to create a digital repository of tobacco advertising material to support scholarship, advocacy, judicial proceedings, and regulatory/legislative deliberations. The online collection has

grown to become the world's largest repository of tobacco advertising images. Most images are high quality scan which are contained within a searchable, meta-data rich, annotated online database. As of January 2024, the online collection ([tobacco.stanford.edu](http://tobacco.stanford.edu)) is comprised of 62,547 tobacco advertisements and has had 1.1M unique users representing virtually every country in the world. The entire compendium of original tobacco advertisements from the 19th, 20th, and 21st centuries now reside in the archives of the National Museum of American History at the Smithsonian Institution. A Smithsonian exhibit featuring the collection "When More Doctors Smoked Camels" ran 2018-2022.

As our group seeks to influence policy, media attention is helpful in communicating the our research findings to policy makers and the public. The work of SRITA has been subject of articles in the New York Times, Time Magazine, Wall Street Journal, Washington Post, SF Chronicle, LA Times, Forbes, Times of London, Vox, Rolling Stone, Mother Jones, Wired, History Channel, The Atlantic, Smithsonian Magazine, and many other media outlets. Numerous TV and radio news shows have featured the work of SRITA including CNN, MSNBC, ABC, NPR, AP, Reuters, and Bloomberg. SRITA research was featured in Netflix Big Vape: The Rise and Fall of JUUL (2023) and CNBC "American Greed" Series on The Rise of JUUL's Business (2023).

As a Stanford University research group, SRITA focuses upon original scholarship utilizing the unique resource of our advertising collection. Our early academic focus was primarily historical study of advertisements using images of physicians and targeted to physicians in medical journals as well as overt health claims so prominent during the 20th century. A primary observation of SRITA research is that the tobacco industry continues to use similar advertising messages in the 21st century as they did in the mid-20'th century (health reassurance, social popularity, romantic success, etc.) although they employ different distribution channels today such as social media and influencers. An important research focus of SRITA is tobacco advertising targeting of special populations such as of women, youth, and Black Americans.

Dr Jackler has been extensively engaged in helping to inform policy through testimony in Congress (House Oversight Committee in July 2019, Senate Subcommittee on Consumer Protection, Product Safety, and Data Security in August 2021) and consultations with the FDA, legislators, regulators, and attorneys general from numerous states. SRITA also collaborates with the World Health Organization, The American Heart Association, and others.

In recent years, SRITA research has focused primarily upon emerging tobacco products such as e-cigarettes, heated tobacco, and novel forms of oral nicotine. SRITA has conducted numerous studies of the promotion of popular products (e.g. JUUL, IQOS, Puff Bar), social media marketing, cessation advertising, nicotine delivery, and the role of flavors in attracting youth. SRITA's 2019 papers "The Nicotine Arms Race" (published in Tobacco Control) together with a research paper on "JUUL Marketing in its First 3 Years on the Market" were foundational in litigation by State Attorneys General leading to both marketing constraints and substantial monetary penalties. In addition to academic journals SRITA publishes comprehensive analyzes via our website (<https://tobacco.stanford.edu/publications/>).

## PROJECTS

- Electronic Cigarette Advertising and its Targeting of Youth - Stanford Research Into the Impact of Tobacco Advertising
- Electronic cigarette marketing via social media channels - Stanford University
- Marketing of emerging tobacco products such as JUUL and IQOS

## Teaching

---

### COURSES

#### 2023-24

- Augmenting Human Senses: Enhancing Perception with Technology and Bioscience: OTOHNS 206 (Aut)

#### 2022-23

- Augmenting Human Senses: Enhancing Perception with Technology and Bioscience: OTOHNS 206 (Aut)

#### 2021-22

- Augmenting Human Senses: Enhancing Perception with Technology and Bioscience: OTOHNS 206 (Aut)
