Bio

BIO

Steven Adelsheim, MD is a child/adolescent and adult psychiatrist who works to support community behavioral health partnerships locally, regionally, at the state level and nationally. He is the Director of the Stanford Center for Youth Mental Health and Wellbeing in the Department of Psychiatry. Dr. Adelsheim has partnered in developing statewide mental health policy and systems, including those focused on school mental health, telebehavioral health, tribal behavioral health programs, and suicide prevention. For many years Dr. Adelsheim has been developing and implementing early detection/intervention programs for young people in school-based and primary care settings, including programs for depression, anxiety, prodromal symptoms of psychosis, and first episodes of psychosis. Dr. Adelsheim is also involved in the implementation of integrated behavioral health care models in primary care settings as well as the use of media to decrease stigma surrounding mental health issues. He is currently leading the US effort to implement the headspace model of mental health early intervention for young people ages 12-25 based in Australia. Dr. Adelsheim also leads the national clinical network for early psychosis programs called PEPPNET.

CLINICAL FOCUS

- Psychiatry
