Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

We are continuing to grow a glomerulonephritis cohort study, including immunologic characterization. We have completed interventional studies of preeclampsia exploring the nitric oxide, endothelin system and effects on glomerular function and morphometry. We continue to recruit patients for treatment and observational studies of glomerular disease, including FSGS, membranous and particularly IgA nephropathy. We also are actively studying renal disease in systemic amyloidosis.

CLINICAL TRIALS
