#### CURRENT RESEARCH AND SCHOLARLY INTERESTS

I am not now actively involved in research, but my past endeavors remain central to my position in guiding medical students in their scholarship pursuits.

The cited publications represent three areas of interest:

- (1) medical student research (Jacobs and Cross)
- (2) women in medicine (Cross and Steward)
- (3) the reproductive physiology of early development (Cross and Brinster)

Only one publication is listed in this area since the research is not current, but others (in e.g. Nature, DevBiol, ExpCellRes) give a broader picture of my pursuit when at the University of Pennsylvania.
